We believe in feeding our bulls for SUCCESS.

Our philosophy is to provide our customers with a bull that is ready to perform in the pasture for several breeding seasons by providing good genetics and being structurally sound. We raise our bulls with no creep feed. We believe in maintaining a healthy herd that can take care of putting the pounds on in the pasture for a steady growth. Through the winter we continue this by feeding a slow and steady protein ration. We will keep the bulls till May to raise a bull to our customer's satisfaction that will keep them continuing to look towards us for all their bull needs.
